

A person is standing on a rocky mountain trail, looking out over a vast mountain range. The sky is blue with some white clouds. The mountains are rugged and have some snow or ice on their peaks. The overall scene is a high-altitude mountain landscape.

TENTS

Chinook Tents are all about the details...

Polyester flysheets with minimum 2000mm PU waterproof coating and extra UV-resistant treatment on fabric for added protection against damaging UV rays.

Bathtub style floors have minimum 2000mm polyurethane coating for super waterproof protection.

Heavy-duty fiberglass poles for reliability and strength, or **lightweight 7000 series aluminum poles** for superior strength and structural integrity under extreme conditions.

Extremely durable nylon coil zippers on all doors and on all windows.

Waterproof construction with polyurethane hot-taped seams on all main floors and fly seams.

Double-stitched and nylon tape-reinforced seams on all strain-bearing upper canopy seams.

Extra large "D" doors with one-zip opening for quick and easy access.

Large door windows with "no-see-um" mesh for added ventilation, visibility and protection from insects.

Web loop and grommet/clip and sleeve systems for reliability, strength and easy pitching.

Heavy-duty guy points made of delta-shaped fiber-glass reinforced polyethylene for superior strength under extreme conditions.

Large gear loft is included with each Chinook tent for added storage space.

Tent accessory package -- All Chinook tents include tent pegs, guy lines and storage sacks for tent, pegs, and poles.

Ultraviolet Light Warning
All tents & tarps Chinook carries are designed for occasional use and not for permanent or continuous season-long use. Prolonged exposure may result in damage from ultraviolet light. UV damage is not covered by our manufacturer warranty.

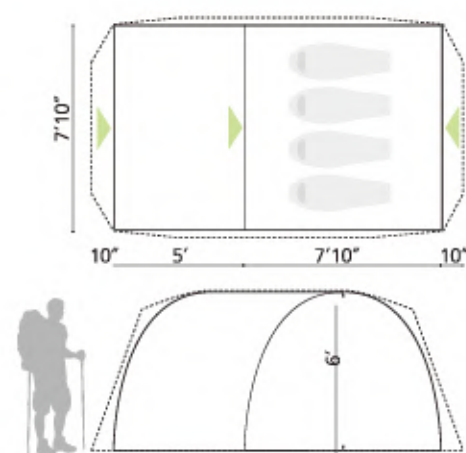

Twin Peaks Guide 4+ Person 3-Season Tents

(Double Wall)

Twin Peaks Guide 4 Product # 11422 (FG Poles)

Featuring another innovative design concept in family/group tents: Chinook's InterDome™, a 2 tent-in-1 system, for double the living space. One very roomy sleeping dome, plus a functional and practical screened dome with a removable heavy-duty floor will make you the envy of the campground.

- » Extremely large screened dome is big enough to fit a picnic table.
- » Both InterDome™ rooms have plenty of headroom with peaks that are 6'6" high.
- » Heavy duty, oxford nylon floor on main dome will stand up to repeated camp cot and foot traffic. Very durable PE floor on the screened dome can be removed if necessary.
- » Two large doors on the fly double as sun and rain awnings.
- » Extra long tent fly has delta panels to help keep rain well away from the tent floor and body.
- » Designed for a quick and easy set-up so you can enjoy the great outdoors faster.

Twin Peaks Guide 4	
Weight	Fiberglass: 24 lb (10.9 kg)
Poles	4 + ridge
Doors	2 doors
Height	6' (183 cm)
Floor	12'10" x 7'10" (391 x 239 cm)
Body area	101 ft ² (9.3 m ²) w/ vestibule: 112 ft ² (10.4 m ²)
Box Size	22" x 10.5" x 10.25" (56 x 27 x 26 cm)

Bivy Sacks

Summit Bivy

HYPERH₂O™

*Sleeping bag not included

Product # 01902BU (Blue) 01902OL (Olive)

The Summit Bivy is an advanced bivy sack system that uses aluminum poles to create a self-supporting canopy around the facial area. This allows better breathability and movement without added exposure to the elements. A great choice for multi-day wilderness trips, snow-camping and emergency situations.

- » Waterproof/breathable nylon top fabric with 2000mm PU coating and waterproof nylon bottom fabric with 5000mm PU coating.
- » Factory-taped seams are completely waterproof.
- » Facial ventilation system for better breathability.
- » Contoured hood and comfortable roomy footbox.
- » Includes a stuff sack.

Size	91" x 32" x 22" / H 17" (230 x 80 x 55 cm / H 42 cm)
Weight	2 lb (0.92 kg)

HYPERH₂O™

Developed exclusively for use in Chinook® products, Hyper H₂O™ is a proprietary waterproof/breathable fabric that is laminate-bonded for excellent moisture-management and durability.

Tent Accessories NEW

Chinook Tarps :: Lightweight :: Waterproof :: Premium quality

These all-condition, all-purpose tarps are perfect anytime you need protection from sun or rain. Compact packing size and lightweight fabric make these the ideal tarps for any backpacking, group camping or water sports trip. Numerous guy points and special catenary cuts ensure a taut pitch.

Used for tents, tarps, awnings, car covers, all purpose
Size 3.5 in (9 cm)
Weight 0.76 oz (21.5 g)
Bulk (2 pieces)

SLEEPING BAGS

CANADIAN DESIGN

It's what we're made of...

Down: We source high-quality down that provides excellent heat retention, performance and comfort from quality suppliers. Naturally lightweight and extremely warm insulation.

Invista's Thermolite® insulation has proven  **INVISTA™** its worth in the most demanding environments. Without any kind of chemical treatment, it guarantees warmth coupled with moisture management during physical exertion. Moisture on your skin or clothing not only multiplies your body's heat loss by 25 percent, it also affects your overall performance and endurance in cold conditions.

Insufil®: Engineered by Chinook and industry leading suppliers, we created several high performing insulation:

Insufil® Thermo is made from a mixture of ultra-fine 3denier and 1.5denier fibers, thermally bonded without resin to provide high warmth without bulk. 

Insufil® 4 is made from a mixture of quattro-thermal fiber and spiral fibers for high loft insulation. 

Insufil® 1 is made from a mixture of hollow-cored fiber and spiral fibers resulting in inexpensive luxury insulation. 

Ripstop Nylon: This nylon utilizes a special grid construction to improve toughness and to resist tearing.

Nylon Taffeta: A 100% nylon fabric commonly used for outer shell. This fabric is specially treated for waterproofing and water-repelling.

Polyester: A synthetic woven material known for being durable+ relatively lightweight. Quick drying, moisture repellant, low stretch.

Flannel: Made from 100% brushed cotton, this familiar plaid fabric is known for its warmth and absorbency.

Cotton: A 100% cotton fabric, commonly used for inner lining due to its comfortable feel.

Polycotton: A 65% polyester / 35% cotton fabric. It is lighter than normal cotton fabric, but with almost the same feel.

Polyester Pongee: Chinook engineered this special polyester fabric, which possesses the comfortable touch of cotton while enjoying the light weight quality of nylon.

Chinook[®] sleeping bags carry these great features

-22°F / -30°C

Sleeping bag temperature rating value represents the bag's **temperature limit** and should be used as reference only. Perception of heat varies from person to person and is dependent on various factors such as, physical condition, metabolism, dress, equipment, etc.

1. All Chinook sleeping bags receive **water-repelling treatments** while select bags receive **water-proofing**.

2. **Zipper Guards** keep zippers snag free and have you zipping in and out of your bag with ease.

3. **Draft Tubes** prevent heat loss through the coils of zippers to help you wake-up fully rested.

4. **Velcro Tapes** make sure you sleep tight by securing zip closures, preventing zippers from accidentally coming undone.

5. **Utility Pockets** take care of loose ends by providing a safe and secure place for stashing your valuables, or alarm clock.

6. **Barrel Lock Closures** give you full control over drawcords so you can easily adjust them to your liking.

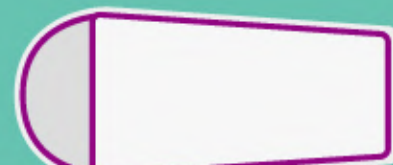

7. **Thermal Collars** fit snugly around your neck and trap warm air from escaping through the collar, all for a warm night no matter the weather outside.

8. All our sleeping bags* come with one of the following sacks: **standard stuff sack, two way compressible stuff sack or four way compressible stuff sack**. *Some of our oversized sleeping bags come in sturdy duffel bags.

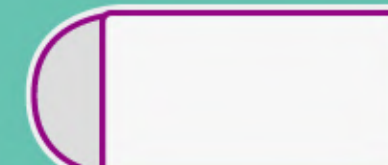

9. Selected Chinook sleeping bags feature **left or right-handed zips** to allow **combining of two sleeping bags together** to form a double bag.

Mummy: This shape is designed along the contours of the human body, thereby eliminating extra cold space. This is the most efficient style.

Tapered with Hood: This shape offers more room for movement than the conventional mummy style while retaining the thermal efficient nature.

Rectangular with Hood: This shape combines the ease of movement from the rectangular sleeping bag with the comfort of the hood component.

Rectangular: This shape offers sufficient room for movement and the option of using it as a comforter, when it is fully opened.

WATERPROOF PROTECTION FOR YOUR VALUABLES

Waterproof IPX Ratings

The IPX standard gives you a clearer picture of how water resistant the item is, compared to vague marketing terms such as 'waterproof'.

The IP Code (or Ingress Protection Rating, sometimes also interpreted as International Protection Rating) consists of the letters IP followed by two digits or one digit and one letter and an optional letter.

The digits (characteristic numerals) indicate conformity with the conditions summarized in the tables below. Where there is no protection rating with regard to one of the criteria, the digit is replaced with the letter X.

IPX-7 rating is more than enough for outdoor sporting requirements.

IPX-0	No protection.
IPX-1	Protected against condensation or dripping water falling vertically.
IPX-2	Protected against spraying water when tilted up to 15 degrees vertically.
IPX-3	Protected against spraying water when tilted up to 60 degrees vertically.
IPX-4	Protected against splashing water from any angle.
IPX-5	Protected against low pressure water stream from any angle.
IPX-6	Protected against high pressure water stream from any angle.
IPX-7	Protected against water immersion. Immersion for 30 minutes at a depth up to 1 meter.
IPX-8	Protected against continual water submersion in under water conditions.

COOKWARE & TABLEWARE

Premium quality stainless steel cooksets made from very sturdy 18/8 polished stainless steel are perfect for any camping trip.

- » Lightweight and extremely durable
- » Cooksets nest into a compact package

ATSKO SNO-SEAL®

Atsko Sno-Seal Beeswax Waterproofing

Product #
62301 (7 oz / 200g jar)
62303 (3.5 oz / 100g tube)

Original Beeswax Waterproofing protects leather from rain, sun, snow, and salt. The beeswax formula dries to a solid wax that “stays put” on the surface and in the pores of the leather so that it lasts longer.

- » Prevents water from penetrating leather
- » Lubricates and conditions leather without softening
- » Preserves and lengthens the life of leather
- » Does not interfere with the natural breathability of leather
- » Extremely resistant to salt stains and spotting
- » Does not soften heel counters or box toes
- » Maintains flexibility in freezing temperatures
- » Will not crack during continual flexing of leather
- » Will not damage seams or welts
- » Contains no silicone

Atsko Permanent Water-Guard

Product # 62319 (17 fl oz / 500mL Spray)

Permanent Water-Guard is solvent free, water-based fluorocarbon polymer water and stain repellent. It dries odor-free and without U-V brighteners. Guaranteed to remain effective even after 25 washings in Sport-Wash or Sensi-Clean. This is an extraordinary claim no other product is willing to make -- not even factory-applied Durable Water Repellents.

Atsko Water-Guard Extreme **NEW**

Product # 62321 (12 fl oz / 354mL Aerosol)

- » Allows leather + fabric to breathe
- » Scent free when dried + cured
- » Safe for use on gore-tex + all waterproof breathable fabrics
- » Contains U-V-BLOCK to protect colors and fabric from sun damage
- » Contains a fungicide to protect the invisible coating from odors and discoloration caused by mold, mildew, fungus and algae
- » For tents, footwear, outdoor clothing, tarps, boat covers, backpacks, golf bags, umbrellas, luggage, flags, + all 24/7 outdoor fabrics

Atsko Sport-Wash

Product # 62315 (18 fl oz / 532 mL)

Sport-Wash® is safe for all washable fabrics, and yet powerful enough to remove odors and your toughest stains such as soil, blood, and grass. Its secret is that unlike other detergents designed to leave brighteners, fragrances, and other residue behind, Sport-Wash rinses completely and cleanly, leaving nothing on your clothing (cotton, wool, insulations and synthetic materials) to clog the pores of your fabric.

- » Helps wickables wick and breathable-waterproof fabrics breathe
- » Restores loft and effectiveness to down and synthetic insulation
- » Rinses away completely leaving no residue
- » Cleans and deodorizes; leaves no scent
- » Safe for all washables; for machine or hand washing
- » Biodegradable and completely septic safe
- » Helps frequently washed garments last longer
- » Helps restore factory applied waterproofing

Atsko Silicone Water-Guard

Product #

62317 (10.5 fl oz / 300g Aerosol)
62311 (4 fl oz / 118mL With Dauber)

Silicone Water-Guard® is suitable for outerwear, footwear, tents, sleeping bags, and suede. Our silicone is specially formulated to apply maximum repellency in a single application. It restores factory waterproofing but still allows materials to breathe. It repels water and stains. Dries in 24 hours and will be odorless and fully cured in 72 hours.

- » Restores and replaces factory waterproofing
- » Works on silicone-impregnated leather
- » Also works on suede, brushed leather, and textiles
- » Allows materials to breathe
- » Contains no chlorinated solvents or propellants in the aerosol (uses environmentally-safe CO₂ instead)
